

# Boosting Emobility Jobs in Africa

The BOOST Project aims to uncover untapped job creation potential in the e-mobility sector in Africa. It follows a sequenced approach with progressive stages, forming an outcome chain for **holistic, sustainable job creation** and development in the crucial e-mobility sector.

Age 15–24

In Rwanda, Ghana and Morocco unemployment rates among young people are **2 times** as high compared to adults.

By investing in skill retention and workforce integration, **BOOST** is paving the way for youth empowerment and prosperity.

## Project Goals

Unlock untapped job creation

Education

Inclusive job creation

Training

## Job Creation Outlook

The transition towards EVs is expected to drive job creation within the manufacturing sector and supporting industries.

Charging infrastructure

Battery manufacturing

Micromobility

Electric car manufacturing

The project aims to create **310 jobs** within Morocco and Ghana and Ghana by its end.
